

### key features

1. Relieves the fatigue of long-standing jobs, open holes allow efficient drainage
2. Beveled accessories increase coverage usage
3. Prevents breakage with its anti-fatigue, cushioning properties
4. Assembles easily with built-in connectors, isolated tiles can easily be replaced
5. Longest warranty in the industry

### suitable applications

- Suitable for wet/oily or dry environments
- Its ability to withstand high temperatures makes it suitable for industrial use, including welding bay areas or areas where spillage of hot materials may occur
- Excellent anti-fatigue properties make it the smart choice to use wherever employees are standing for a long period of time

### product data

Material: SBR/NBR Rubber

Appearance: Smooth with 22mm holes. Thickness: approx 3/4"

Chemical Resistance: Resistant to water, acid, degreasing agents and antifreeze

UV Resistance: Resistant to UV

Operating Temperature: -20°C to +160°C

Flame Retardancy: Conforms to DOC FF2/70 US Department of commerce for surface flammability. When forced to burn, carbon monoxide, oxides of nitrogen and sulphur are emitted

### installation & cleaning

Installation: Loose lay interlocking tiles

Cleaning: Pressure wash or steam clean (using a mild detergent if necessary)

### nominal size

Sizes: 3'x3', 3' x 5', 3' connect, 3' bevel w/corner

Colours: Terra cotta
